

3-3.5 RENDERING PLANTS

Provisions of the zoning ordinance permitting the care and keeping of livestock, fowl, or fur bearers; fabrication and portion control; meat sorting, processing, packaging or storage; recycling of useful materials; or other uses of land not specifically containing the words 'rendering plant' shall not be deemed to permit the rendering, storage or processing of livestock or animal by-products, or the storage or processing of animal waste materials.

Exclusion: This section shall not prevent the customary farm practice of removing manure from a barn or pen used for raising livestock, fowl, or fur bearers and applying the manure as fertilizer on fields used for raising crops or pasture.
